Industry	Information Technology
Employment Type	This is a full-time on-site permanent role, 5 days a week
Job Level	This is a Mid – Senior Level Position with 03 – 05 years of experience
Education	BS(CS) / BS (SE)
Location	G-8, Islamabad

About Your Role:

We are seeking a highly skilled and experienced individual to join our software development team as a Dot Net MVC Developer. The resource will play a crucial role in developing web applications using the Microsoft .NET MVC framework. They will be responsible for designing and implementing features, ensuring the scalability and performance of the application, and maintaining code integrity. Their tasks include creating controllers, views, and models to handle user interactions, integrating databases, and collaborating closely with front-end developers and other team members to deliver high-quality software solutions. Additionally, staying up to date with the latest advancements in .NET technologies and adhering to best coding practices are essential aspects of their role.

Your Impactful Goals Will Include:

- Understand business logic involved in the system and deliver as per client's requirement.
- Creating process flows and code accordingly for enhancements and changes.
- Perform Unit and Integration Testing.
- Work with the Team Lead during System Integration Testing.

- Ability to solve problems quickly and completely.
- Provide support on LIVE projects and work efficiently to design, develop, test and deliver project modules within assigned deadlines.
- Strong user interface designing skills and ability to follow quality coding practices with clear and well-documented code.
- Team player with excellent communication skills in English, both spoken and written.

Functional Skills Requirement:

- Experience in developing ASP.NET MVC applications
- Experience with HTML, JS, and CSS
- Experience with front-end libraries such as jQuery, jQuery Data Tables
- Proficiency in C#, LINQ and OOP concepts
- Experience using .NET 4.5+
- Knowledge of ADO.NET
- Knowledge of Microsoft SQL Server (MSSQL)
- Knowledge of Web API development in ASP .Net framework
- Knowledge of API related tools like Postman, Swagger
- Familiarity with Azure/AAD authentication would be a big plus
- Knowledge of security and testing tools such as OWASP ZAP, Snyk and SonarCloud would be a big plus
