Industry	Information Technology
Employment Type	This is a full-time on-site permanent role, 5 days a week
Job Level	This is a Mid-Senior Level Role with 02 - 05 years of experience
Education	BS(CS) / BS (SE)
Location	G-8, Islamabad

About Your Role:

We are seeking a highly skilled and experienced individual to join our team as a Full Stack Developer. The hired resource will be responsible for both back-end and front-end development, as well as software development. The daily tasks of this role will include designing, developing, testing, and implementing software to meet both our clients' and customers' needs.

Your Impactful Goals Will Include:

- Understanding the project requirements: Needs to have a clear understanding of the project requirements, including the business goals and the technical specifications.
- Developing software applications: Should be able to write clean and efficient code to develop software applications using the .NET framework, Visual Studio, C#, ASP.NET Core.
- Debugging and testing applications: Must be able to debug and test the applications to ensure they meet the project's requirements and are free of errors.
- Collaborating with team members: Should be able to work closely with other developers, designers, and project managers to ensure that the software application is delivered on time and meets the

project requirements.

- Maintaining and updating software applications: Maintaining and updating software applications to ensure they continue to meet the project's requirements and function as intended.
- Keeping up to date with emerging trends: Should keep up-to-date with emerging trends and technologies related to the .NET framework to ensure that the software application is using the latest and most efficient techniques.
- Providing technical support: Needs to provide technical support to end-users to help them use the software application properly.

Functional Skills Requirement:

- Must have 2 ~ 5 years of experience in full stack application development using React.js and Dot Net Core.
- Must have ability to work with databases (SQL and NoSQL) and write the stored procedures & create complex queries.
- Good to have knowledge of micro frontend architecture.
- Good to have ability to build reusable components and front-end modules in Angular/React.
- Good to have knowledge of Azure Services.
- Good to have knowledge of Azure AD Authentication and Entra External ID.
- Good to have knowledge of Data Warehouse / ETL techniques.
- Good to have experience in .Net MVC.
- Must be able to work with .NET 6 and above, APIs.
- Hands-on experience with Azure DevOps and repositories.
- Ability to solve problems quickly and completely with proactive involvement.
- Team player with good communication skills and positive attitude towards work.
- Perform Unit and Integration Testing.
- Work with the Team Lead during System Integration Testing.
