Industry	Information Technology
Employment Type	This is a full-time on-site permanent role, 5 days a week
Job Level	This is a Mid-Senior Level Role with 03 - 05 years of experience
Education	BS(CS) / BS (SE)
Location	G-8, Islamabad

About Your Role:

We are looking for a highly skilled and experienced iOS Developer to join our mobile development team for a 6-month contract. You will play a key role in designing, developing, and maintaining iOS applications that are aligned with our business needs. You will be responsible for implementing new features, optimizing app performance, and ensuring the scalability and maintainability of the application. The ideal candidate should have a deep understanding of iOS development frameworks and tools and be proficient in collaborating with cross-functional teams to deliver top-tier mobile solutions.

Your Impactful Goals Will Include:

- Understand and translate business logic into scalable, efficient mobile applications
- Collaborate with UI/UX designers to deliver a seamless and high-quality user experience
- Write clean, maintainable, and well-documented code
- Perform Unit and Integration Testing for quality assurance
- Work closely with the Team Lead during system integration and debugging phases
- Ensure timely delivery of project milestones and efficiently support live projects
- Stay updated with the latest trends in iOS development and apply best coding practices

- Demonstrate strong problem-solving skills and the ability to troubleshoot issues quickly

Functional Skills Requirement:

- 3 to 5 years of experience in iOS development.
- Proficiency in Swift and Objective-C.
- Strong understanding of Apple's frameworks such as UIKit, SwiftUI, Core Data, Core Animation, etc.
- Solid knowledge of architectural patterns such as MVVM, MVC, and their implementation in iOS projects.
- Experience with RESTful APIs and mobile libraries for networking (Alamofire, URLSession).
- Experience in working with version control tools like Git.
- Familiarity with Apple's design principles and interface guidelines.
- Experience with tools such as Xcode and CocoaPods.
- Experience with local storage solutions such as CoreData, SQLite, or Realm.
- Knowledge of security best practices and testing methodologies for mobile applications.
- Experience with cloud services and iOS app authentication using Firebase, AWS, or Azure.
- Excellent communication skills in English.
