About Your Role:

We are seeking a highly skilled and experienced individual to join our software development team as a Software Engineer. The Software Engineer will be part of a high-performing development team focused on Angular, .NET Core, and Microsoft Azure services. The ideal candidate will bring deep expertise in cloud-native architecture, data platforms, and micro front-end design to deliver scalable enterprise applications.

Your Impactful Goals Will Include:

Design and Develop Scalable Applications

- Need to have a clear understanding of the project requirements, including the business goals and the technical specifications.
- Develop high-performance, cloud-native enterprise applications using Angular and .NET Core.
- Ensure scalability, maintainability, and responsiveness across multiple platforms and environments.
- Optimize cloud solutions for performance, cost-efficiency, and operational reliability.

Code Quality and Implementation of Data-Driven Features

- Write clean, modular, and testable code following industry best practices.
- Participate in peer reviews and maintain coding standards to ensure a robust codebase.
- Promote continuous improvement through feedback and refactoring.
- Integrate data platforms like SQL Data Warehouse, Cosmos DB, and Snowflake to enable intelligent, real-time application features.
- Support data-centric decision-making through seamless backend integration.

Agile, DevOps Integration and Teams Collaboration

- Contribute actively to Agile/Scrum teams deliver iterative enhancements and high-quality features.
- Participate in sprint planning, daily stand-ups, and retrospectives to support team alignment.
- Use Azure DevOps for task management, version control, CI/CD pipelines, and automated testing.
- Collaborate with cross-functional teams to ensure seamless feature delivery.
- Facilitate clear communication and shared ownership throughout the development lifecycle.

Functional Skills Requirement:

- Core Technologies: Angular, .NET Core, C#, and JavaScript.
- Databases: SQL Data Warehouse, Cosmos DB, and Snowflake
- Azure Cloud: Microsoft Azure (Synapse, Functions, App Services, Blob Storage, Functions, API Management and Event Hub)
- Azure DevOps (Board, Repos, Pipeline, and Test Plans)
- Others: Agile/Scrum methodologies and an iterative development process.
- Team player with effective communication skills and positive attitude towards work.
- Perform Unit and Integration Testing.
- Collaborate with the Team Lead during System Integration Testing.
