<b>Job Level</b>	This is a Beginner level role with 01 - 02 years of experience
<b>Education</b>	BS(CS) / BS (SE)
<b>Location</b>	G-8, Islamabad

### About Your Role:

We are looking for a Full Stack Developer with 1-2 years of experience to join our team. The ideal candidate will be responsible for developing and maintaining applications using .NET Core and SQL Server, optimizing database performance, and ensuring seamless API integration. This role requires a proactive problem-solver with experience in GIT/Azure DevOps, testing methodologies, and a strong collaborative mindset.

### Your Impactful Goals Will Include:

- Develop scalable applications by building and maintaining efficient, high-quality solutions using .NET Core and SQL Server, ensuring optimized performance.
- Enhance API and database efficiency by designing secure APIs and optimizing stored procedures and queries for improved data processing.
- Ensure code quality and testing through unit and integration testing to maintain reliability and smooth system integration.
- Streamline development with DevOps by utilizing GIT/Azure DevOps for version control, repository management, and CI/CD workflows.

- Troubleshoot and optimize systems by identifying and resolving issues proactively, improving overall system performance and scalability.
- Collaborate and communicate effectively with teams, maintain clear documentation, and contribute to a positive, productive work environment.

### Functional Skills Requirement:

- Must have 1 ~ 2 years of experience in full stack application development.
- Must have the ability to work with SQL Server and create stored procedures and complex queries.
- Must be able to work with .NET Core and create APIs (good to have development experience in React).
- Hands-on experience with GIT or Azure DevOps and repositories.
- Good to have knowledge of Azure Data Factory, ETL Process and other Azure services.
- Ability to solve problems quickly and completely with proactive involvement.
- Team player with good communication skills and a positive attitude towards work.
- Perform Unit and Integration Testing.
- Work with the Team Lead during System Integration Testing.
